### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In claim 1, line 7 and claim 7, line 15, after "over said" insert - - straight - - . This change has been made to claim the plate projecting over the straight edge as seen in the figures instead of the curved edge in order to avoid confusion even though the "engageable edge" is the straight edge.

The following is an examiner's statement of reasons for allowance: None of the cited references, alone or in combination, disclose the brassiere and front closure with the female closure half having a semielliptical plate with a planar obverse surface which has a straight edge and a curved edge and with an annular formation on a reverse side of the plate overhanging the straight edge and an elongated opening formed in the annular formation and a male closure half with a semielliptical plate with a planar obverse surface with a straight edge and a curved edge and a lug on the reverse side of the semielliptical plate projecting over the straight edge engageable in the opening to form the closure of the brassiere..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 3765

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
